# **ADVOCACY REPORT**

**FNQROC  
Mayoral Delegation  
1-2 August 2023**

# FNQ AT A GLANCE

ADVOCACY REPORT

# FNQ REGIONAL PRIORITIES AT A GLANCE:

### INFRASTRUCTURE PIPELINE REVIEW

In undertaking this review, we would also ask the Federal Government to consider:

- a) The impact on program delivery and construction programs in areas with a regular wet season (funding from December to April)
- b) Regular stream grants are much more efficient as councils can plan their capital programs and the money goes where it is needed, not just to the Councils who can afford great grant writers.
- c) The continuation and increase in funding of allocation-based programs, such as R2R and LRCI (with simplified reporting, such as what is required under LRCI)
- d) Local Government own source roads expenditure obligation under R2R is difficult for smaller, financially constrained councils to fulfil.
- e) Streamline application and reporting processes for IIP projects.
- f) The new Growing Regions application process is quite complex, with projects needing to be 'construction ready', however the turnaround in applications is around 6 months. In the current economic climate, holding rates fixed for this period will be problematic.
- g) The continuation of a ROSI type program to provide the full efficiency outcomes for HPV's and the national supply chain.
- h) Dedicated funding program aimed at increasing high productivity vehicles (HPV) access to and from gazetted transport routes with a regional focus on Ootann Road and Richmond-Croydon Road being local government owned road train routes.

### FINANCIAL ASSISTANCE GRANTS

Estuarine and freshwater crocodiles are an important part of north and central Queensland's wetlands, freshwater and marine areas. They are often the largest predator in these areas and help to maintain the overall health and balance of these ecosystems.

Estuarine crocodiles live mainly in tidal reaches of rivers, as well as in freshwater lagoons, swamps and waterways up to hundreds of kilometres from the sea. They can even occur along some beaches and around offshore islands. Estuarine crocodiles can be active at anytime.

**Report crocodile sightings**

- Only crocodiles that **live** there are their own protection
  - Never swim in water where crocodiles may live, even if there is no warning sign present.
  - When fishing, always stand a few metres back from the water's edge and never stand on logs or branches overhanging the water.
  - Never clean fish or discard fish scraps near the water's edge or at boat ramps.
  - Stay well back from any crocodile slide marks. Crocodiles may still be close and may approach people and boats.
  - Keep your arms or legs inside of the boat when fishing.
  - Never provoke, harass or interfere with crocodiles—even small ones!
- 
- Map of Queensland, Australia**
- The map shows the coastline of Queensland, Australia, with four cities marked: Mackay, Rockhampton, Gladstone, and Brisbane. A red line runs along the coast from Mackay to Brisbane, indicating the distribution of crocodiles.
- Never feed crocodiles—it is illegal and dangerous.
  - Never leave food scraps at your campsite. Always check that previous campers haven't left any food scraps.
  - Never provoke, fight, wash dishes or pursue any other activities near the water's edge or adjacent sloping banks.
  - Be more aware of crocodiles during the breeding season—September to April.

## Our local lady's Trip to Darwin.

Puliima Language and Technology 2023 Conference Darwin is the biggest of it's kind in the world they say. Our group of four from Wujal Wujal attended this year presenting the digital kuku learning cards developed locally. We look forward to expanding our collection of resources. The conference was very busy and we were able to join several workshops on saving our language. Awesome conference to be involved with, a learning experience and networking opportunities. Our language and cultural resources for future generations is a asset to Eastern Yalanji people made locally.
