

**Wujal Wujal Renewed Approach
to Alcohol – Community Safety
Plan Proposal**

Background

The purpose of the renewed approach to alcohol through improving community safety and wellbeing is to ensure communities and individuals are safe, thriving and self-empowered to manage and reduce alcohol-related harm and improve wellbeing.

The renewed approach retains carriage limits and is based on a partnership between the Queensland Government and communities to:

- Co-design new CSP and other coordinated initiatives and strategies that reduce demand; target illicit alcohol (sly grog and homebrew); build community capacity and readiness; and promote a healthy culture and attitude towards alcohol including through legal liquor licensing options
- Explore minor changes to carriage limits on a case-by-case basis, pending community and Government agreement, and provided that a CSP is in place
- Revise AMPs to reflect the outcomes and results of co-design and community engagement.

Wujal Wujal's Renewed Approach to Alcohol

Wujal Wujal's broader agendas including economic development, Closing the Gap as well as Wujal Wujal Aboriginal Shire Council's Corporate Plan all include a range of measures and indicators which contribute to the story of our prosperity, health and wellbeing.

As part of the development of the Wujal Wujal Community Safety Action Plan these indicators will be reviewed and local community indicators will be determined to better report the progress related to improve community safety and wellbeing.

Implementation Principles

The CSP implementation processes will be clarified by key agencies in conjunction with the community, the approach will be developed acknowledging that:

- We are committed to working together to move from surviving to thriving.
- We will embrace the humanity of people, and their capacity for excellence.
- Our focus is on health, wellbeing and safety of our most vulnerable people, in particular women and children.
- Individuals, families, community leaders, service providers and governments all have a role to play.
- We will tailor approaches that address citizens' specific priorities and concerns such as addressing sly grog.
- Rebalancing the focus between supply, demand and harm reduction is crucial to success, embedded in a broader holistic approach, which includes a stronger focus on effective treatment services and harm reduction strategies to support people who are addicted to alcohol, or are suffering an illness as a result of alcohol consumption.
- Safe and responsible modifications to community carriage limits which are unpinned by stable harm rates; strong local leadership; community agreement, a demonstrated healthy culture and attitude towards alcohol; and access to effective demand and harm reduction services.

Alcohol Management Plan

Wujal Wujal has had an Alcohol Management Plan since 2004.

The Wujal Wujal restricted area is the Wujal Wujal Aboriginal Shire area including all public and private places. This includes all foreshores to the low watermark, internal waterways and roads.

In 2010, three land lots on the southern side of the Bloomfield Crossing were added to the restricted area. This includes lot 8 on plan RP903515, lot 9 on plan RP903516 and lot 10 on RP903517 and all roads, tracks, proposed roads and foreshores that pass through or bound the shire area.

The following roads and public areas are specified roads and public facilities where a '[bona fide traveler](#)' exemption may be applicable for people travelling through the restricted area:

- Bloomfield Road
- Bloomfield Crossing
- road known as Douglas Street
- Rossville-Bloomfield Road
- the road directly connecting Douglas Street and the Bloomfield Falls (does not include the service road for Douglas Street)
- the car park near the Bloomfield Falls
- the car park at the Wujal Wujal Arts and Cultural Centre.

No alcohol or homebrew and homebrew equipment is allowed in restricted areas.

Renewed Approach to Alcohol Community Consultation Timeline.
